Nicholas Arcuri

Technical Lead | Senior Full-Stack Engineer (TypeScript, Node.js, React, GraphQL)

Brooklyn, NY (open to remote) · (848) 480-3425 · hello@nickarcuri.com · nickarcuri.com · github.com/nikarc

Summary

Technical Lead and full-stack engineer with 10+ years building production web applications in TypeScript, Node.js, and React, from architecture through deployment. Leads engineering teams and mentors junior engineers while staying hands-on in the code, working in an AI-assisted development workflow built on Claude Code. Deep experience integrating third-party transactional APIs (real-time booking, payments, commerce), building GraphQL services, and working with PostgreSQL and MySQL on AWS, Docker, and Vercel. Product-minded: scopes work directly with PMs and ships platforms that serve millions of users per month.

Experience

Big Human | New York, NY | Oct 2021 – Present

Technical Lead | Aug 2026 – Present

- Lead client engineering teams delivering production web and mobile applications for clients including Rockefeller Center and Fusion Worldwide, owning code quality and on-time delivery.
- Partner with product managers to scope work, plan delivery, and hit deadlines.
- Mentor junior and SWE I engineers.

Software Engineer III | Aug 2025 – Aug 2026

- Architected and built a new full-stack e-commerce platform for RockefellerCenter.com, integrating Ventrata's Octo API for real-time booking and payment processing and Sanity headless CMS for content management.
- Built in TypeScript with Next.js 15 (App Router), React 19, and Tailwind v4 in a pnpm monorepo.

Software Engineer II | Aug 2023 – Aug 2025

- Led planning and implementation of a new ticketing integration for Rockefeller Center's Top of the Rock and Rink attractions, serving millions of users per month.
- Helped build and deploy a Python-based GraphQL server powering Fusion Worldwide's first e-commerce platform.
- Delivered backend and frontend features across Node.js, React, and GraphQL for client projects.

Software Engineer I | Oct 2021 – Aug 2023

- Ramped up quickly to own full-stack feature development (Node.js, React) across simultaneous client engagements, including fitness and tourism platforms.

Spartan | Brooklyn, NY

Software Engineer | Apr 2020 – Sep 2021

- Built and deployed the Shopify Plus e-commerce platform for spartan.com, an ultra-endurance racing company, with Contentful CMS powering dynamic storefront content.

One Rockwell | New York, NY

Full Stack Engineer | Jan 2019 – Mar 2020

- Implemented a Kubernetes-orchestrated microservices architecture with RabbitMQ message queuing.
- Built Node.js services for order processing, inventory management, and shipping webhook integrations.
- Launched and maintained Shopify e-commerce sites for global brands including tula.com, verabradley.com, and samedelman.com.

onthestage.com | New York, NY

Full Stack Developer | Jan 2015 – Jan 2019

- Built a live-performance ticketing and seating platform from the ground up with a Node.js/Express backend, AngularJS frontend, and MySQL and MongoDB databases.
- Deployed on AWS and extended the platform with a native iOS app in Swift.

Skills

- **Languages:** TypeScript, JavaScript, Python, Swift/SwiftUI

- **Backend & APIs:** Node.js, Express, GraphQL, REST APIs, third-party API integrations, webhooks, Stripe, Adyen
- **Frontend:** React, Next.js, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Infrastructure:** AWS, Docker, Kubernetes, RabbitMQ, microservices, monorepos (pnpm), Git
- **AI-Assisted Development:** Claude Code (Superpowers, Caveman), Cursor, ChatGPT
- **Platforms & CMS:** Sanity, Contentful
- **Leadership:** Technical leadership, mentoring, project scoping with PMs
